ABOUT ME

As a recent graduate in software engineering, I have gained practical experience through a five-month placement and a three-month internship, thereby developing a robust foundation in Java and C# with a particular focus on object-oriented programming. My personal projects in React, NodeJS, MongoDB, and Python have served to deepen my passion for software development. Currently, I am expanding my expertise in Kotlin and .NET Core. I am a proactive learner, driven by a collaborative and solution-focused approach, and I am eager to contribute to your team.

PROJECTS

MessApp | |

📅 April 2025 – April 2025

- .NET 9 SignalR HUB .NET WEB API Katmanlı Mimari MongoDB NextJS Tailwindcss
- Web API Backend Frontend
- MessApp, a real-time messaging application, allows users to use messaging with registration, login processes and dark-light theme compatibility. I developed it with .NET 9 and SignalR as backend, layered architecture and NextJS and TailwindCss as frontend.

Mactopik | |

📅 September 2024 – October 2024

- NodeJs Express Cheerio Kotlin Compose Myself API
- Mobile API Backend Frontend Fragment Activity Compose UI
- On the backend side, a mobile application that pulls data from the official site of the TFF with the API I wrote and visualises the Turkish Super League data using the kotlin language with compose design and MVVM design pattern for the frontend.

Wordyy | |

📅 September 2024 – October 2024

- Kotlin Firebase Login-Register Gemini API CRUD
- Mobile API Backend Frontend Fragment Activity
- Wordyy is a mobile application that I developed using Gemini API and Google Firebase, using the kotlin language, which helps to learn English with its user registration, login and personalised vocabulary dictionary structure and a multi-page English language that allows it to dynamically translate.

.NET Store APP | |

 June 2024 – July 2024

- .NET-Core ASP.NET MSSQL Entity Farmework Identity Framework Katmanlı Mimari
 - Web API Backend Frontend
 - *In the light of the information I learnt in my long-term internship, I developed a fullstack e-commerce website using .NET-8; admin panel, Product, Delivery, Category and user transactions are e-commerce websites developed using MSSQL database and .NET-8 Web-API.*
-

NFT APP | |

 June 2023 – July 2023

- React NodeJS MongoDB TailwindCss
 - Web3 BNB-Chain
 - *NFT upload, delete, filtering etc. It is an NFT WEB3 web application that includes CRUD operations. It includes user login, registration and admin operations.*
-

Car Speed Detection | |

 June 2023 – July 2023

- Python OpenCV
 - Image Process
 - *It is an application that I developed as a result of my studies on face, object and vehicle detection using Python language and CV2 (OpenCV) library with what I learned in my short-term internship.*
-

Phone e-commerce App | |

 October 2023 – February 2024

- React Typescript Provider Prisma MongoDB AuthJs TailwindCss
 - Phone Store App Login Register
 - *It is a web project that I developed to learn Typescript and current libraries. I used MongoDB, AuthJs, Prisma and React, a powerful library on the frontend side.*
-

Extract Title From Video | |

 December 2023 – June 2024

- Python Chat-GPT-API Django
- AI Model GPT3.5-Turbo
- *Chat-GPT is a Web project that uses the API and the Django Web library in Python to find names for videos that people create themselves or are undecided about the name. In other words, it can be called a title extraction project from the video.*
